### DETAILED ACTION

1. The abstract of the disclosure is objected to because it contains parenthetical statements. Correction is required. See MPEP § 608.01(b).

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1,2,5-9,12-21,24 and 25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,668,743. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the currently claimed limitations are within the patented claims, and therefore the current application claims are not patentably distinct thereover.

4. Claims 3,4,10,11,22 and 23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 6,668,743 in view of Haruguchi et al.

Claims 1-7 of U.S. Patent No. 6,668,743 fail to claim the constructed by an inner hull with attached appendages.

Art Unit: 3617

Haruguchi et al. teaches an original hull, and a final hull formed by sponsons attached to the original hull.

It would have been obvious to one of ordinary skill in the art at the time of the invention to construct the '743 claimed hull from a modified original hull as taught by Haruguchi et al.

Such a combination would have been desirable at the time the invention was made so as to provide an improved stability hull with low resistance.

5. Claims 26-33 are allowed.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Burgess discloses a hull having a volume providing concave surfaces in the bow, and a bow keel approximately of the length claimed.
